ABOUT OUR COMPANY

Corporate Headquarters: 10831 Canal Street, Largo, FL 33777

Company Profile Overview:

The mission of International is to become the supplier of choice for all customers by providing the highest quality signs possible and exceeding out customers' expectations. We can reach this goal by utilizing continuous project management and exceptional customer service. In reaching this goal we strive to provide moral and ethical values in a team relationship approach to business between our clients and valued employees.

A handwritten signature in black ink, appearing to read 'William H. Griffin'. The signature is written in a cursive style.

William H. Griffin
President

ACCOUNT MANAGEMENT SERVICES

Some of the services available in this program are:

1. Site Survey - A complete site survey of your location will be arranged. With the information obtained in the survey, a complete proposal for the proper identification of your location will be submitted for your approval. All proposals will meet local sign codes and/or landlord sign criteria.

2. Installation - Each proposal will include the cost of International to arrange for and handle the installation. If you elect to take advantage of this service, all permits and the necessary drawings and details will be provided by International. Once the permit is obtained, the sign(s) will be manufactured and installed. A copy of the permits and photographs of the completed installation will be attached to each invoice. A schedule to keep you advised of the process of each project will be provided to you at your request.

3. Electrical - The signs will be connected to the proper existing electrical service by the installer. If electrical service is needed, specifications will be provided to you so your local electrician can run the service and would be quoted on a per-job basis.

4. Custom Signs - If you require a sign that is not your standard identification package, a custom design package complete with artwork and all specifications will be provided to you. International has the facilities, equipment and personnel to design and produce any type of sign you may require. You can be assured that the quality of the sign will maintain the highest public image and still provide you with the lowest cost available.

5. Design and Engineering - International has a complete Design & Engineering Department. With each identity program, customers are provided with a complete set of construction and installation drawing for each item in the program

6. Warranty - All signs produced by International are warranted for a period of 12 months for the date of installation (except lamps), if installation is provided by International. If during that period of time a sign should malfunction, just call International at 1-727-541-5573 and we will have the sign repaired at no cost. Repairs made without prior approval of International may void the warranty

7. Other Services - The staff of International is available to assist you with any identification needs that may develop. The purpose of this service is to avoid problems that can occur with national sign identification programs and to maintain the proper public image through a uniform quality sign identification program.

RESTAURANT & HOSPITALITY

In the Restaurant & hospitality industry making people feel welcome and at home is what it is all about. The last thing you want to deal with is problems when it comes to signs. Those problems are eliminated when you select International. With International it's as simple as 1, 2, 3....

- 1 - Quality
- 2 - Customer Service
- 3 - Competitive Pricing

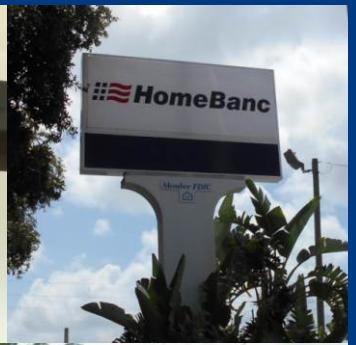

Pride of workmanship is still at the core of every sign we manufacture. State of the art technology, and use of the finest raw materials available blend to make our products second to none.

RESTAURANT & HOSPITALITY

RETAIL, BANKING & PETROLEUM

Our Customer service personnel, under the direction of your account executive, will provide you with a complete turnkey project. We will obtain necessary landlord approvals, obtain engineering when required, file for permits, coordinate with your general contractor, and install your signs when you want them. That's what it is all about: turnkey service, high quality products, timely installation, on going service, and competitive pricing.

CUSTOM SIGNS

Our commitment to custom and development work is to provide professional management. To achieve this goal, we employ a team approach to all projects. The individual who oversees a project is responsible for things such as submittals, including shop drawings, color samples, and or prototypes. In addition, they are to see that all necessary permits are obtained, oversee quality control during the manufacturing process, and planning the installations with the installation coordinator to ensure a smooth, trouble free completion of the project.

CUSTOM SIGNS

At International, customer service is not just a catchy phrase, but rather a genuine commitment to you. We recognize that without you we cannot exist as a company. We know that in order to attract and keep good customers, servicing their needs is our number one priority. Service after the sale is a continuing on-going process with us. From the very inception, providing design services, to long after the sale we remain ready and available.
